2003/2004 ROOFING COLLECTION

INNOVATIONS FOR LIVING™

Give your roof top consideration

Your roof works hard inside and out, protecting your home against strong winds, extreme temperatures, rain and snow. In fact, your roof makes up as much as 50 percent of your home's exterior. This means that your roof should not only perform well, it should be beautiful, too.

A complete Owens Corning Roofing System can add value to your home. A properly installed roof can even help improve your home's ventilation and, in turn, its comfort year-round. This guide can help you select the Owens Corning roof that's right for you.

†Owens Corning strives to accurately reproduce photographs of shingles. Due to manufacturing variances, the limitations of the printing process and the variations in natural lighting, actual shingle colors and granule blends may vary from the photo. The pitch of your roof can also impact how a shingle looks on your home. We suggest that you view a roofing display or several shingles to get a better idea of the actual color. To accurately judge your shingle and color choice, we recommend that you view it on an actual roof with a pitch similar to your own roof prior to making your final selection. Color availability subject to change without notice. Ask your professional roofing contractor for samples of colors available in your area.
